

Electric Belt Cutter

- Quick and simple to operate with minimal effort
- High precision cut every time
- 2 models, up to 25mm or up to 50mm thick material
- Electric operation, a unique feature
- 7 times the torque of conventional pneumatic cutters
- Suitable for rubber with a hardness of 25° Shore A and upwards
- CE approved
- Configurable for right or left handed operation

Technical specifications:

| Type | E0020 | E0021 |
|--------------------------|--------------------------------------|--------------------------------------|
| Housing | all Stainless Steel | all Stainless Steel |
| Knife | Ø 170mm | Ø 225mm |
| Knife quality | HSS steel | HSS steel |
| Motor | 110 V. 580 W, reversible, Hitachi | 110 V. 750 W, reversible, Metabo |
| Speed motor | variable, 0 – 2.900 RPM | variable, 0 – 3.000 RPM |
| Speed knife | variable < 40 RPM | variable < 40 RPM |
| Torque | approx. 280 Nm, depending the RPM | approx. 340 Nm, depending the RPM |
| Weight | 7 kg | 13 kg |
| Cutting capacity | 25 mm maximum | 50 mm maximum |
| Hardness material | from 25° to 90° Shore A | from 25° to 90° Shore A |
| For materials | conveyor belts, rubber and PU sheets | conveyor belts, rubber and PU sheets |
