Electric Buffing Machine

Features

- 4 carbide S-wheels, different grit sizes available
- Adjustable grinding depth
- Dust suction outlet
- Robust stainless steel construction
- Safety hood and side plates
- CE certificate

Advantages against conventional grinding/ buffing

- Speed – up to 50% faster
- Life of SSG grit grinding disc up to 6 times longer than conventional copper bonded tungsten carbide tools
- Discs changed in around 10 minutes
- Clean – suction outlet allows dust to be contained

Technical Specification

Housing	All Stainless Steel
Grinding Discs	Vane Wheels Ø 110, thickness 6, bore Ø 22, width 30, keyway 6mm, 4 pieces
Discs Grit Quality	Tungsten carbide, Chrome Nickel bonded, grit size standard: 390 SSG ®. Other grit sizes available.
Grinding Width	Up to 87mm
Grinding Depth	Adjustable
Dust	Integrated dust suction connection in the side plate
Motor	230V 1600W
Speed Motor	1750 rpm
Weight	10 kg
For materials	conveyor belts, rubber & PVC and PU profiles/ sheets

We recommend using safety goggles, gloves and hearing protection for personal safety
